1. The following is an examiner's statement of reasons for allowance: of claims 1, 3-6, 8, 9, 18, 20-24, 32-34, 42 and 43. Claims 1, 3-6, 8, 9, 18, 20-24, 32-34, 42 and 43 are allowed because the prior art did not teach or reasonably suggest providing querying, from the peer, an overlay network peer group for a first set of transport network distances between the overlay network peer group and one or more overlay network peer group neighbors of the overlay network peer group, wherein: the overlay network peer group comprises one or more locality-aware peers each having locality-awareness comprising information regarding the one or more overlay network peer group neighbors and the one or more peers within the overlay network peer group; and each of the one or more overlay network peer group neighbors of the overlay network peer group has a direct overlay network connection to the overlay network peer group; measuring, at the peer, a second set of transport network distances from the peer to each of the one or more overlay network peer group neighbors of the overlay network peer group; and determining, at the peer, to join the overlay network peer group if, for each transport network distance in the first set of transport network distances, an absolute value of a difference between the transport network distance in the first set of transport network distances and a corresponding transport network distance in the second set of transport network distances is less than a threshold transport network distance value.
